

Isan Rodriguez Trimino

AI Augmented Tech Lead | Full-Stack Expert | RAG

isanrtech@gmail.com | [Phone : +1 \(341\) 246-4084](tel:+13412464084) | <https://www.linkedin.com/in/isan-rodriguez/>

About me

I am a seasoned full-stack developer with over 15+ years of experience designing and building scalable, high-impact solutions across diverse industries. I am deeply passionate about team collaboration, architecting robust software systems, and adhering to S.O.L.I.D principles and clean coding practices. I bring a strategic, "think twice, code once" approach to problem-solving, ensuring solutions are not only efficient but also maintainable and future-proof.

As a proactive leader and mentor, I excel in guiding teams, fostering a culture of continuous learning and driving alignment between technical vision and business goals. I embrace AI-driven development tools to enhance productivity, accelerate and complement my learning while maintaining high-quality standards. I thrive in tackling complex challenges, exploring innovative technologies, and delivering results that scale with the needs of the business.

Tech Stack

- **Backend:** Python (FastAPI) | JavaScript/TypeScript (Node.js, ExpressJS, NestJS).
- **AI:** Langchain | RAG (pgvector) | Github Copilot
- **Data:** MongoDB, PostgreSQL, MySQL, Redis.
- **Cloud/Infra:** AWS, Docker, Linux, NGINX, Jenkins.
- **Frontend:** ReactJS, Vue.js, HTML/CSS, JavaScript/TypeScript.
- **Engineering Practices:** CI/CD, clean architecture, SOLID Principles, Design Patterns, Domain-Driven Design, Code review culture, AI Assisted Development tools, Api Design, Software Architecture.

Experience (only the last 4)

(NOTE : Many of the project I'd worked are properties of my formers employers and they don't want to publish information on then, hence I won't describe any detail that can compromise this.)

Teach Lead at SunAlgo

(March 2025 - Present Day)

- Led multiple cross-functional projects, overseeing end-to-end delivery from technical design to deployment.
- Served as the primary liaison between clients and internal teams, gathering requirements, aligning expectations, and ensuring technical feasibility.
- Collaborated directly with multiple clients across different industries, translating business needs into scalable software solutions.
- Championed the use of AI-powered tools (such as ChatGPT, GitHub Copilot, and custom automation scripts) to enhance team productivity and accelerate development cycles.

- Mentored developers and promoted best practices in architecture, code quality, and DevOps workflows.

Tech Lead at Lucid Motors

(February 2023 - March 2025) | Remote (US) | Full-time

- Drove architecture and delivery for a business-critical financial platform processing high-value workflows at scale.
- Improved the loan/lease approval workflow, reducing turnaround time from days to seconds for 10k daily active users; supported revenue-generating flows (thousands of dollars).
- Led and mentored 6+ developers and coordinated work across frontend, backend, and DevOps teams, aligning execution with quarterly OKRs.
- Owned system design and delivery using ReactJS, NestJS, MongoDB, and AWS; emphasized reliability, security, and release discipline.
- Partnered with Finance and Product as a technical bridge, translating business needs into technical requirements, delivery plans, and sprint goals; mitigated delivery risks.

Senior Software Engineer at Wizeline

(October 2021 - February 2023) | Remote (US) | Full-time

- Worked as a full-stack engineer on client projects, clarifying requirements with stakeholders and balancing delivery with maintainability and quality.
- Improved team delivery throughput by ~25% by strengthening execution hygiene (planning, code review standards, and reducing rework).
- Mentored junior developers; supported onboarding and ran workshops on clean code and scalable architectures.
- Contributed to authentication/login flows and backend APIs, prioritizing correctness and security fundamentals.

Enterprise Architect at Rooftop Ventures

Enterprise Architect at Rooftop Ventures

(December 2020 - October 2021) | Mexico | Full-time

- Led architecture decisions and delivery across multiple web-based projects, owning code quality, PR reviews, and infrastructure direction.
- Scaled the product portfolio from 3 to 11 active products by standardizing architecture patterns and delivery practices.
- Improved production stability from weekly interruptions to rare occurrences (about 1 every 3 months or less) by introducing quality methods and release discipline.
- Increased developer leverage from ~1 developer per product to 3–4 products per developer through shared components, reusable patterns, and better workflows.
- Delivered containerized deployments via Jenkins pipelines and NGINX-based hosting infrastructure.
- Implemented real-time features via WebSocket and ensured PWA capabilities for cross-device UX.
- Improved knowledge sharing across the team to reduce single points of failure.

Languages

Spanish (Native) | English (B2) | French (A1)

Education

- Bachelor of Education in Computer Science
