About me

I am a seasoned full-stack developer with over 15+ years of experience designing and building scalable, high-impact solutions across diverse industries. I am deeply passionate about team collaboration, architecting robust software systems, and adhering to S.O.L.I.D principles and clean coding practices. I bring a strategic, "think twice, code once" approach to problem-solving, ensuring solutions are not only efficient but also maintainable and future-proof.

As a proactive leader and mentor, I excel in guiding teams, fostering a culture of continuous learning and driving alignment between technical vision and business goals. I embrace AI-driven development tools to enhance productivity, accelerate and complement my learning while maintaining high-quality standards. I thrive in tackling complex challenges, exploring innovative technologies, and delivering results that scale with the needs of the business.

Teach Lead at SunAlgo

(March 2025 - Present Day)

- Led multiple cross-functional projects, overseeing end-to-end delivery from technical design to deployment.
- Served as the primary liaison between clients and internal teams, gathering requirements, aligning expectations, and ensuring technical feasibility.
- Collaborated directly with multiple clients across different industries, translating business needs into scalable software solutions.
- Championed the use of AI-powered tools (such as ChatGPT, GitHub Copilot, and custom automation scripts) to enhance team productivity and accelerate development cycles.
- Mentored developers and promoted best practices in architecture, code quality, and DevOps workflows.

Tech Lead at Lucid Motors

(February 2023 - March 2025) | Remote (US) | Full-time

- Drove architecture and delivery for a business-critical financial platform processing high-value workflows at scale.
- Improved the loan/lease approval workflow, reducing turnaround time from days to seconds for 10k daily active users; supported revenue-generating flows (thousands of dollars).
- Led and mentored 6+ developers and coordinated work across frontend, backend, and DevOps teams, aligning execution with quarterly OKRs.
- Owned system design and delivery using ReactJS, NestJS, MongoDB, and AWS; emphasized reliability, security, and release discipline.

- Partnered with Finance and Product as a technical bridge, translating business needs into technical requirements, delivery plans, and sprint goals; mitigated delivery risks.

Senior Software Engineer at Wizeline

(October 2021 - February 2023) | Remote (US) | Full-time

- Worked as a full-stack engineer on client projects, clarifying requirements with stakeholders and balancing delivery with maintainability and quality.
- Improved team delivery throughput by ~25% by strengthening execution hygiene (planning, code review standards, and reducing rework).
- Mentored junior developers; supported onboarding and ran workshops on clean code and scalable architectures.
- Contributed to authentication/login flows and backend APIs, prioritizing correctness and security fundamentals.

Enterprise Architect at Rooftop Ventures

(December 2020 - October 2021) | Mexico | Full-time

- Led architecture decisions and delivery across multiple web-based projects, owning code quality, PR reviews, and infrastructure direction.
- Scaled the product portfolio from 3 to 11 active products by standardizing architecture patterns and delivery practices.
- Improved production stability from weekly interruptions to rare occurrences (about 1 every 3 months or less) by introducing quality methods and release discipline.
- Increased developer leverage from ~1 developer per product to 3–4 products per developer through shared components, reusable patterns, and better workflows.
- Delivered containerized deployments via Jenkins pipelines and NGINX-based hosting infrastructure.
- Implemented real-time features via WebSocket and ensured PWA capabilities for cross-device UX.
- Improved knowledge sharing across the team to reduce single points of failure.

Tech Lead at Walook Mexico (December 2018- November 2019)

Tech lead on a survey system project for a third party client that allows custom survey creation with multiple levels of hierarchy

- Backend development using Laravel 5 (PHP Framework)
- VueJS with Vuetify for the client app

Freelancer 2013 - 2018

(Dates from 2013 to 2018 will show more employments because I had multiple jobs.) Freelancer working on multiple projects, the tech stack used was mainly but not limited to:

- PHP/Yii Framework (version 1 and 2)
- jQuery
- Wordpress
- Joomla
- Linux (Ubuntu)
- Nginx
- Apache
- Raspberry Pi
- Git

- Mysql and MariaDB

Clients and Projects:

- 2013 and 2015, Computer maintenance for private individuals.
- 2014 to 2015 Statistical system for Pesca Caribe.
- 2014 Computers maintenance for Cadena Cubana del Pan.
- 2014 to 2016, intranet for Casa Miglis private restaurant.
- 2016 tracuba.com solo project for private rent houses and restaurants.
- 2016 Website for Centro de Arte contemporaneo Wifredo Lam, included making the Joomla template as per design.
- 2016 Website for the Etno Cultural project afrokuba.com
- 2016 to 2018 Social platform with private communication and media-sharing features
- 2017 to 2018 NeST software for Cubatur, software system to standadize and facilitate the handling of turistical offers for hotels.

Centro de Arte Contemporaneo Wifredo Lam 2016 to 2017

Webmaster and tech support Duties: They offer me a postion after purchasing the website from me.

Webmaster, software engineer and tech support. I had to take care not only of the website that I previously did using Joomla, but also took care of the network and tech support in general.

- Stack
- Joomla
- jQuery
- MySQL

Grupo Geominsal 2010 to 2013

- Software developer and tech support,
- Duties: Software developer, tech support, Computer maintenance, network instalation. Responsible for the internal intranet website.
- Tech Stack
- PHP/Yii 1
- Joomla

AZUGRUP 2007 to 2010

Duties, Tech support, network administrator, accountant system administrator and support. I was responsible for a few internal tools and managing the server for the account department.

- Software developer and tech support
- Tech Stack: Joomla 1, Delphi7.

Tech Stack

- **Backend:** Python (FastAPI) | JavaScript/TypeScript (Node.js, ExpressJS, NestJS).
 - **Data:** MongoDB, PostgreSQL, MySQL, Redis.
 - **Cloud/Infra:** AWS, Docker, Linux, NGINX, Jenkins.
 - **Frontend:** ReactJS, Vue.js, HTML/CSS, JavaScript/TypeScript.
 - **Engineering Practices:** CI/CD, clean architecture, SOLID Principles, Design Patterns, Domain-Driven Design, Code review culture, AI Assisted Development tools, Api Design, Software Architecture.
-

Languages

Spanish (Native) | English (B2) | French (A1)

Education

- Bachelor of Education in Computer Science
